FOR IMMEDIATE RELEASE

ADS HP Storm Pipe Meets Newly Approved AASHTO M330

HILLIARD, Ohio – (August 28, 2013) – Advanced Drainage Systems, Inc. (ADS), announced today that its HP Storm Pipe meets the new requirements of AASHTO M330 for use in culvert and storm sewer pipe projects. This new specification pertains specifically to HP Storm pipe, 12-inch through 60-inch dual and triple wall. Both public and private specifying agencies rely on The American Association of State Highway and Transportation Officials (AASHTO) for product specifications such as pipe for use in transportation infrastructure projects.

"AASHTO specifications represent the culmination of extensive work by key department of transportation officials who make up AASHTO's Subcommittee on Materials. It completes a strong foundation of specifications and approvals that include those from ASTM and the U.S. Army Corps of Engineers for this premium product. This particular specification highlights the need for products in high performance storm sewer applications," stated Ryan Zenkewicz, Storm Sewer Market Manager.

HP Storm adds to ADS' broad line of product offerings for storm water projects. This product offers premium joint performance, enhanced stiffness over traditional storm sewer products, provides increased longitudinal beam strength, and superior chemical, stress crack and abrasion resistance.

The pipe is manufactured from impact modified copolymer polypropylene resin. The HP Storm's smooth interior wall promotes excellent flow rates while its corrugated structure maximizes stiffness and strength. All HP Storm pipe diameters feature an extended integral bell and spigot joint with dual gaskets and polymer reinforcement for maximum joint integrity. The pipe is available in 20-foot (6m) and 13-foot (3.9m) lay lengths to accommodate various trench box dimensions.

A complete line of fittings, taps and manhole connections are available from ADS. For additional information call ADS at (800) 821-6710, go to www.ads-pipe.com or contact any local ADS office.

About ADS:

Advanced Drainage Systems, Inc. (ADS) is the world's largest producer of corrugated HDPE pipe. Founded in 1966, it serves the storm and waste water industry through a global network of 56 domestic and international manufacturing plants and more than 28 distribution centers. In addition to its flagship N-12[®] pipe, the company offers a complete line of fittings and other accessories including StormTech[®] storm water chambers, Nyloplast[®] drainage structures, FLEXSTORM[™] Inlet Filters and various geotextiles.
